

thick cut sirloin steak

fry/griddle/bbq

The core temperature is measured from the centre of the meat. For perfect cooking and measuring internal temperatures, we recommend a 'Meater+ Wireless Thermometer'. Available in our pantry now.

Whilst I personally develop, try and test all our recipes and cooking guides, heritage breed animals can vary immensely, therefore cooking times are a guide only. Please ensure all products are cooked through and hot before serving. Enjoy!

Jeff Baker

Executive Development Chef

cooking time from: 8 minutes

method

Remove your steak out of the packaging, pat dry and bring to room temperature.

Pre heat a griddle or heavy based frying pan large enough to hold the meat until it sizzles when you add a drop of oil.

Season the steak liberally with sea salt just prior to cooking.

To start render the fat a little then sear the steak on both sides over high heat creating a rich, dark crust then reduce to medium heat.

Cook 4 to 5 minutes each side turning the steak a couple of times, basting the steak with foaming butter for the final couple of minutes of cooking.

For a medium rare steak, press the steak with your thumb it should have a slight spring to touch & a core temperature of 52°C before resting.

Leave to rest in a warm place for half the cooking time before carving.

serving suggestions

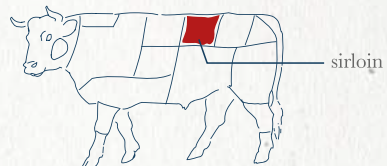

Serve with sauté potatoes, peppercorn sauce & watercress.

for best results, griddle this cut

Core Temperatures	Out of the Oven	After Resting
Rare	48-50°C	52-54°C
Medium Rare	52-54°C	56-58°C
Medium	58-60°C	60-62°C
Well Done	65-68°C	70-75°C
